

# Well-traveled terrace

Eclectic furnishings and colorful patterned fabrics lend this outdoor room worldly panache. Here's how to create an equally spirited spot at your place

→ **IN THE AUGUST HEAT**, there's nothing more inviting than a shady alfresco hideaway—especially when it's as lively as summer itself. Take this globally inspired outdoor room, put together by California-based interior designer Kathryn M. Ireland. "The homeowners wanted it to feel exotic, like someplace in Mexico or Morocco," says Ireland. So she assembled handcrafted pieces from a variety of cultures for the Spanish Mission-style home's covered patio. To add a sense of playfulness—and complement the climbing bougainvillea—she lightened the dark, hand-carved furniture with bright cushions from her own fabric line. Their vibrant colors offer a cheery contrast to the aged patina of the furnishings and accessories.

Read on for ways to assemble a globe-trotting corner in your own backyard.
